

# The Coffee Supply Chain

- From farm to cup in five steps
- Ask me anything along the way

# Growing & Harvesting

- Arabica grows at 1000-2000m altitude
- Cherries are hand-picked when ripe
- One tree yields ~0.5kg of beans per year

# Processing Methods

- Washed: fruit removed before drying - cleaner taste
- Natural: dried inside the fruit - sweeter, heavier body
- Honey: partial fruit left on - in between

# Roasting

- Light roast: higher acidity, origin flavors
- Dark roast: bitter, roasty, less caffeine by volume
- First crack at ~196C, second at ~224C

# Brewing & Cost

- A \$5 latte contains ~\$0.40 of coffee
- Espresso: 9 bars pressure, 25-30s extraction
- Grind size is the most common home-brew mistake
